

Appendix A: English survey instrument

In which country do you work? (write in) _____

In which hospital do you mainly work? (write in) _____

Where is that hospital located?

Rural Suburban Urban

What type of hospital is it? Public Private Other

At that hospital, how many patients do you provide care for every week on average?

0-50 51-100 101-150 >150

How many beds does your hospital have? (select 1)

<50 50-149 150-300 >300 I don't know

In which department do you mainly work? (select 1)

General surgery Emergency/trauma care ICU

Other (specify): _____

How old are you? (select 1)

18-30 31-45 46-60 >60

How many years have you practiced medicine/surgery? (select 1)

Student 1-10 11-20 21-30 >30

1. What is your level of English reading comprehension? (select 1)

None Elementary Limited working proficiency

Professional proficiency Native language

2. My level of English fluency negatively impacts my ability to successfully search for and find answers to clinical questions online: (select 1)

Strongly agree Agree Neutral

Disagree Strongly disagree

3. How do you translate information to answer your clinical questions when needed? (select multiple)

Google Translator DeepL

All the information I need is in a language I understand

Colleagues help me

I do not need to translate the important information

Other (specify): _____

4. My access to and quality of translation for medical information is sufficient for clinical use: (select 1)

Strongly agree Agree Neutral

Disagree Strongly disagree

5. How often do you have uncertainty regarding any particular aspect of clinical care (i.e: dosing)

(select 1)

multiple times a day at least daily

at least weekly at least monthly never

6. How frequently do you have a clinical question that you cannot answer using online or in-person resources? (select 1)

multiple times a day at least daily

at least weekly at least monthly never

7. Select the top 3 resources you most often use to adequately address your uncertainties in specific clinical care scenarios:

Printed academic books Presentations

Full text peer reviewed journal articles

Clinical point of care summary (i.e: UpToDate)

Meta-analyses (i.e: Cochrane review)

Guidelines (ie: American College of Surgeons)

Open access, not peer reviewed (i.e: Wikipedia)

Colleague SciHub Abstracts Other (specify): _____

8. How do you most often access priced medical literature:

I don't have access to priced medical literature

Shared subscription with colleagues SciHub

Individually purchased Institutionally purchased

Other (specify): _____

9. I feel confident in my ability to interpret and apply peer reviewed medical journal articles to my clinical practice: (select 1)

Strongly agree Agree Neutral

Disagree Strongly disagree

**** Answer the following questions using all the resources available to you** (for example: internet, journal subscriptions, medical information summaries, colleagues)

All clinical questions relate to patients with no other comorbidities, unless specifically stated in the question.

10. Sepsis:

a. What is your target mean arterial blood pressure in patients with septic shock requiring vasopressors? (select 1)

- 55 mm Hg 60 mmHg 65 mm Hg 70 mm Hg

b. What would you use as your first-choice vasopressor for a patient in septic shock? (select 1)

- Dopamine Norepinephrine Dobutamine
 Vasopressin Epinephrine

c. Based on which hemoglobin concentration should you begin red blood cell transfusion? (select 1)

- <7.0 g/dl >7-9 g/dl 10-12 g/dl 12-14 g/dl

d. What resources did you use to answer these clinical questions? (select all that apply)

- Printed academic books Presentations
 Full text peer reviewed journal articles
 Clinical point of care summary (i.e: UpToDate)
 Meta-analyses (i.e: Cochrane review)
 Guidelines (ie: American College of Surgeons)
 Open access, not peer reviewed (i.e: Wikipedia)
 Colleague SciHub Abstracts Other (specify): __

11. Appendicitis:

a. For uncomplicated appendicitis, how long should you continue antibiotics after an appendectomy? (select 1)

- 0-24 hours 4 days 7 days There is not enough evidence to decide

b. Should you provide a post-operative drain in appendicitis patients? (select 1)

- Yes, it lowers the incidence of intra-abdominal abscess
 No, it causes more complications, and increases length of stay and recovery time
 There is not enough evidence to decide

c. What resources did you use to answer these clinical questions? (select all that apply)

- Printed academic books Presentations
 Full text peer reviewed journal articles
 Clinical point of care summary (i.e: UpToDate)
 Meta-analyses (i.e: Cochrane review)
 Guidelines (ie: American College of Surgeons)
 Open access, not peer reviewed (i.e: Wikipedia)
 Colleague SciHub Abstracts Other (specify): __

12. I had adequate resources to answer these questions in this survey efficiently and effectively:

(select 1)

- Strongly agree Agree Neutral
 Disagree Strongly disagree

13. I am interested in learning more about evaluating evidence to apply to my clinical practice: (select 1)

- Strongly agree Agree Neutral
 Disagree Strongly disagree

14. I am interested in learning how to conduct my own research to answer my clinical questions:

(select 1)

- Strongly agree Agree Neutral
 Disagree Strongly disagree
